

Safe Handling of Portable Liquid Cylinder (PLC)

Handling of PLC

USE an appropriate trolley or install a frame with wheels for short-distance movement and move slowly

AVOID standing in the line of fire

NEVER roll a PLC

DO not try to catch falling PLC

MOVE PLC in the truck liftgate and secure by straps; preferably handled by two operators

In case of any leak, move the PLC to a safer location when it is safe to do so and inform the supervisor

Securing PLC

ENSURE PLC remains upright & secured by using a restraint-ratchet belt

USE wheel lock device while storing the wheel-mounted PLC; do not move PLC on an uneven surface

Recommended PPEs

PROTECT your eyes from any accidental release of gases/liquid

USE Safety Hand Gloves and Safety Helmet

WEAR Safety Shoes
